Shymkent Airport Safety Policy

A safety management system is one of our main management systems and is designed to continuously improve the level of safety in our company through the introduction of best world practices and standards in the field of security, which in turn builds confidence and trust among our customers and future partners and introduces the vital foundation of our production and business success. We provide distribution of a safety management system for all our aviation activities.

Starting with the Chairman of the Board, authority at all levels and all employees are responsible for the attainment of safety high level.

We commit to:

Implement safety management through the provision of all relevant resources.

Ensure sufficient qualified resources for the implementation and compliance with safety policies.

Develop and implement processes to identify hazards to eliminate or reduce the risk of "Shymkent Airport" JSC to the lowest practicable level.

Promote open and clear safety culture. Ensure employee, reporting about the problem of safety through the system of hazards data presentation protection from taking any measures of influence, except in cases where such report rightly points out illegal actions, gross negligence or willful or malicious violation of the procedures rules.

Maintain and, where possible, exceed legal and regulatory requirements and standards.

Ensure all the staff of "Shymkent Airport" JSC, provision of adequate and appropriate safety information, appropriate training to ensure the necessary qualifications commensurate with the acting.

Regularly make an assessment of safety performance in comparison exposed realistic goals.

Maintain and continuously improve the safety management system by the airport management processes that ensure appropriate and effective measures in the field of safety.

Ensure compliance of systems provided and services by external sources for our operations safety standards

Any unavoidable deviations from this policy must be document properly, our processes and procedures associated with it are clearly defined.

Chairman of the Board
